How the report will be formatted

- There was a suggestion to do the report by institution size. Three categories:
- Large — greater than 10,000 enrollments
- Midsize — 2,500 to 10,000 enrollments
- Small — less than 2,500 enrollments
- This will enable programs to review similar sized programs.

Feedback

- How do we get more programs to participate?
- What additional information should we be collecting?
- How can we make the survey process easier?
- How should we report the data gathered?
